Window films and Shatterproof window films

1:45-2:00-INTRODUCTION OF VENDORS

2:00pm-2:45pm- Confidence Consulting Group, Garrett Brown

Roof & Building Envelope Solutions

2:45pm-3:00pm-BREAK/VISIT VENDORS

3:00pm-3:45pm-Shive-Hattery, Karen Hardisty, is a licensed structural engineer with Shive-Hattery, an Iowa based architecture and engineering firm. As a mother of two, she has a passion for creating safe spaces for students during storm events. She has 15 years of experience, including identifying refuge areas and designing storm shelters for K-12 and public sector clients.

Severe storms are in the news with increased frequency. As awareness of these events increases, we hear more concerns about building occupant safety during high wind events & tornadoes. This presentation will provide attendees with a 3-tiered approach to storm safety solutions. While a code-compliant storm shelter is the ideal solution, they often require years of planning to fund and construct. Intermediate steps are available to make immediate improvements in protecting building occupants. Attendees will gain a better understanding of identifying refuge areas and planning for future storm shelters.

3:45pm-4:00pm-BREAK

4:00pm-5:15pm-Walk to Springville High School for Tour

5:30pm--6:00pm-Social Time at American Legion

6:00pm--Dinner at Daisy's Garage

6095 Carlson Way

Marion, IA 52302

Friday, April 11, 2025

Breakfast at hotel

8:45 am-9:00am

Business Meeting: Maury Gallagher, ISBGA president

Discussing upcoming conferences and other business

9:00 am-9:45 am Terracon: Rob Kramer

Geophysics – Utilizing emerging technologies to manage assets and reduce risk

Effective site exploration, evaluation, and testing are critical for successful engineering and construction projects. In recent years, the integration of non-destructive geophysical testing as well as various other technologies, have led to improved efficiencies and enhanced project outcomes. Specific education/school related applications include pavement evaluation and management, utility mapping, concrete/structural evaluation, and vibration monitoring, among other things. These processes help to improve quality and efficiency and mitigate risk on your projects.

9:45-10:00-VISIT VENDORS

10:00 am-10:45 am Musco Sports Lighting, LLC Brook Hermsen, Creative Services and Promotions Lead

Musco has shaped the history of sports lighting since 1976. The company's TLC for LED technology delivers unmatched light quality, control, efficiency, and reliability.

10:45am-11:00am-BREAK
